

Tribhuvan University
Faculty of Humanities & Social Sciences
OFFICE OF THE DEAN
2025

Bachelor in Computer Applications
Course Title: Cyber Law and Professional Ethics
Code No: CACS 401
Semester: VII

Full Marks: 60
Pass Marks: 24
Time: 3 hours

Candidates are required to answer the questions in their own words as far as possible.

Group B

Attempt any SIX questions.

[6×5 = 30]

2. Differentiate Ethics and Moral. Why is fostering good business ethics important? [2+3]
3. Explain Cyberstalking. How response should be made in Cyber attack? [2+3]
4. What is digital signature? Why are professional ethics important in the IT field? [2+3]
5. What are the essential ethical considerations in decision making system? [5]
6. What are some of the key issues that must be considered when trying to determine if material on the Internet is obscene? [5]
7. Define an intellectual property. What is plagiarism and write its types. [2+3]
8. Write short notes. (Any TWO) [5]
 - a) Reverse Engineering
 - b) CMMI Model
 - c) Contingent Workers

Group C

Attempt any TWO questions.

[2×10 = 20]

9. Define Whistle-Blower. How can you implement CIA at Network, Application and End User Level? [2+8]
10. What are some of the current issues associated with the protection of intellectual property? [10]
11. Explain the concept of cyber defamation. What are current Social Networking ethical issues? [3+7]

Bachelor in Computer Applications
Course Title: Cloud Computing
Code No: CACS 402
Semester: VII

Full Marks: 60
Pass Marks: 24
Time: 3 hours

Candidates are required to answer the questions in their own words as far as possible.

Group B

Attempt any SIX questions.

[6×5 = 30]

2. Explain the key factors that organizations should consider before adopting cloud computing. [5]
3. Explain the concept of Cloud design and implementation using Service-Oriented Architecture (SOA). What are the benefits of adopting SOA in Cloud computing? [3+2]
4. Explain the benefits of virtualization in cloud computing. How does it improve resource utilization and reduce operational costs? [2+3]
5. How does the Map-Reduce model work, and what are its advantages over traditional methods for processing large data sets? [3+2]
6. Describe the key strategies for ensuring data security in a cloud environment? [5]
7. Describe the role of cloud computing in business and consumer applications. How does cloud technology benefit businesses in terms of scalability and cost-effectiveness? [2+3]
8. How do cloud computing platforms support scientific applications? Discuss the benefits of using the cloud for high-performance computing (HPC) in scientific research. [2+3]

Group C

Attempt any TWO questions.

[2×10 = 20]

9. What is thread? Describe how thread programming is done in cloud. Discuss how virtualization is transforming the IT industry and its significance in cloud computing. [1+4+5]
10. What are the critical aspects of application security in the cloud? Explain the techniques used to secure applications hosted in the cloud and prevent potential vulnerabilities from exploitation. [3+7]
11. What is a Community Cloud? Discuss how it is different from Public and Private Clouds and explain the situations where Community Cloud deployment is beneficial. [1+9]

Bachelor in Computer Applications
Course Title: Software Project Management
Code No: CACS 407
Semester: VII

Full Marks: 60
Pass Marks: 24
Time: 3 hours

Candidates are required to answer the questions in their own words as far as possible.

Group B

Attempt any SIX questions.

[6×5 = 30]

2. Discuss the process of software project management and its key phases.
3. Explain Precedence diagramming method for representing activities and their dependencies.
4. Describe the steps involved in the Critical Path Method (CPM) for project scheduling.
5. Compare the bottom-up and top-down estimation approaches in software effort estimation.
6. What are the key components of a cost-benefit analysis in software evaluation?
7. Explain the different categories of risks in software project management.
8. What are the elements of Software Configuration Management (SCM)?

Group C

Attempt any TWO questions.

[2×10 = 20]

9. Explain in detail the process of Software Project Management (SPM) and how it differs from other project management methodologies. [10]
10. Describe the importance of strategic assessment in project evaluation. How does it help in aligning a software project with an organization's strategic goals? Discuss the key factors to consider during strategic assessment. [3+3+4]
11. Describe the various quality management practices in software projects. How can quality assurance and quality control be implemented effectively? [5+5]

Bachelor in Computer Applications

Course Title: E-Governance

Code No: CACS 409

Semester: VII

Full Marks: 60

Pass Marks: 24

Time: 3 hours

Candidates are required to answer the questions in their own words as far as possible.

Group B

Attempt any SIX questions.

[6×5 = 30]

2. Why is the implementation of e-Governance important for delivering government services to citizens effectively? Explain with a relevant example.
3. Elaborate the current global trends in the growth of e-Governance.
4. Describe realized level and its sublayer of the e-Governance model.
5. Explain the utility of data warehousing and data mining in census and prices of essential commodities.
6. Mention the differences between G2G and G2B.
7. What are various IT tools that are used to deliver services to citizens?
8. Write brief notes on:
 - a) Cloud Governance
 - b) Nagarik App

Group C

Attempt any TWO questions.

[2×10 = 20]

9. Discuss the current scenario of cyber law in Nepal. Explain the E-Governance initiative taken by government of Nepal and also explain the challenges for these initiative. **[5+5]**
10. Why is e-Governance infrastructure vital? Explain the role of network infrastructure, computing infrastructure, and data centers in e-Governance for Nepal. **[5+5]**
11. Distinguish between e-Government and e-Governance. Provide a short explanation of e-Governance applications and the concept of the digital divide in context of Nepal. **[5+5]**
